

- **SONOFF T3EU TX Smart Wifi Black wall touch switch with smart home edge**

SONOFF T3EU Wifi Smart Wall Switch can be controlled remotely using your phone, and devices connected with switches can operate independently. It works with Amazon Alexa and the Google assistant that allows you to turn your devices on or off with a voice command - perfect for those who need to handle a lot of housework simultaneously. A light touch for easier control. Set a time for the devices and the switches will help you turn them on or off automatically. Customize the Smart Scene for your devices. Simply set up an event to activate a SONOFF device or groups of devices with a tap on your phone! Your devices will not work due to an abnormal WiFi network, therefore, the LAN control is designed to ensure that they can function normally. Note 1: SONOFF T3 EU supports 433MHZ remote control, we suggest using SONOFF RM433. Note 2: SONOFF T3 EU with an edge, will not be easily damaged.

## Remote Control Application

Touch the eWeLink app to turn on a light anytime, anywhere. An illuminated house awaits your arrival

## RF Control

An alternative control when there is no network available for your smartphone

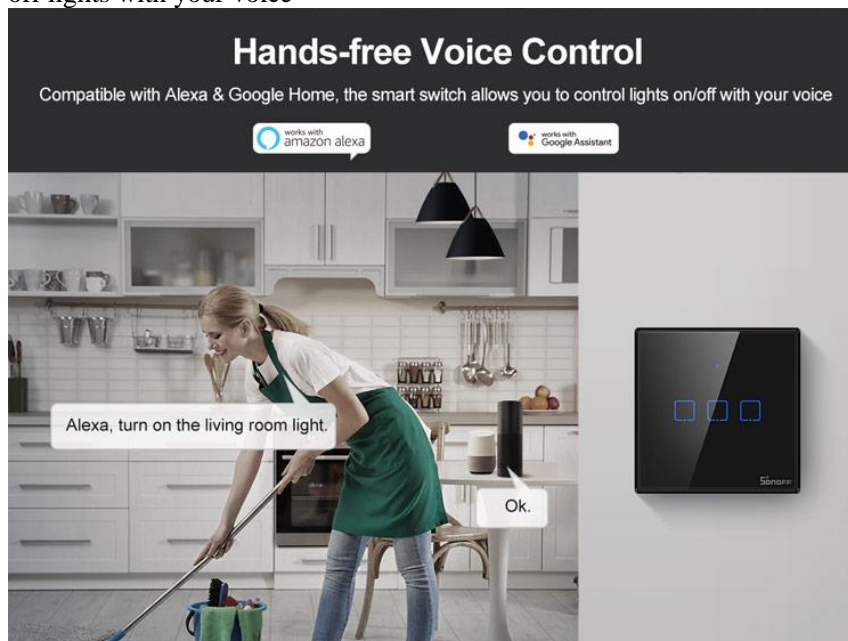

## Share the Control

Share the control of your appliances with your family or friends so they can also control the devices remotely

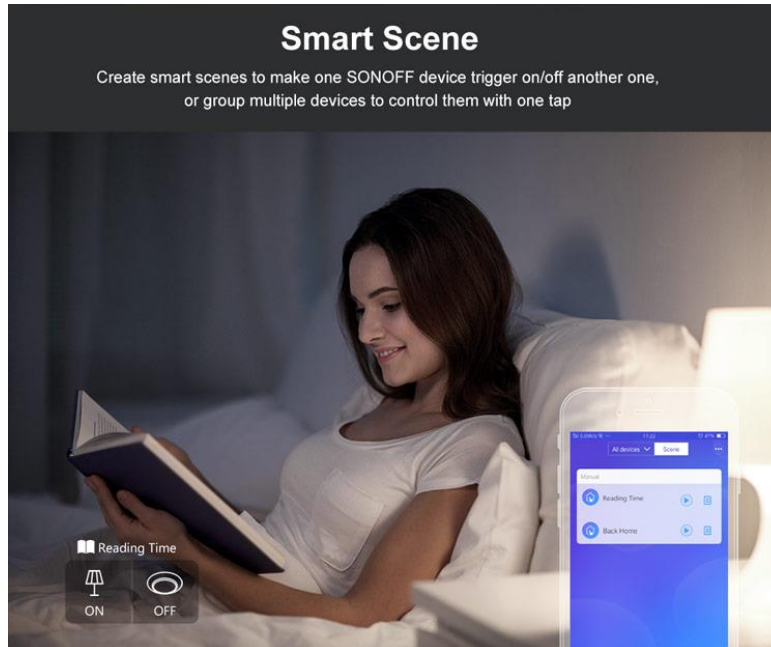

## Hands-free voice control

Compatible with Alexa and Google home. The smart switch allows you to control the on / off lights with your voice

## Smart scene

Create smart scenes to make one SONOFF device turn on / off another, OR group several devices to control them with one-touch

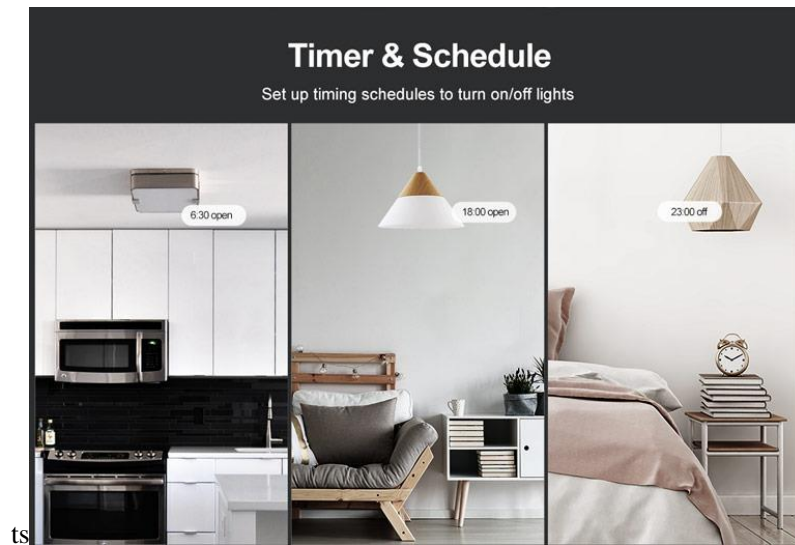

## Status Synchronization

Real-time device status can be provided in the eWeLink application so you can track the change of status of your devices

## Timer and calendar

Set schedules to turn on / off lights

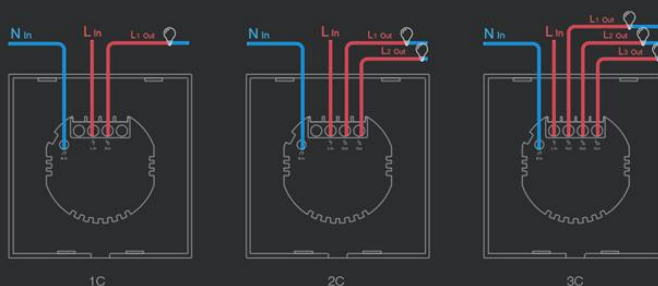

## Tempered Glass Panel Design

Fireproof and easy to clean toughened glass panel and PC case design not only decorate your home, but also feel soft as a mobile phone screen

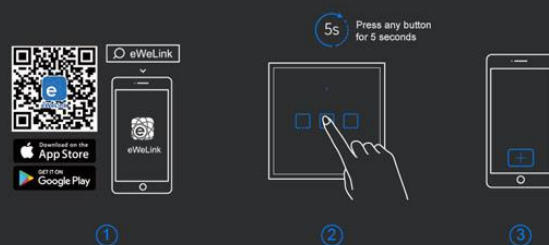

## Wiring Diagram

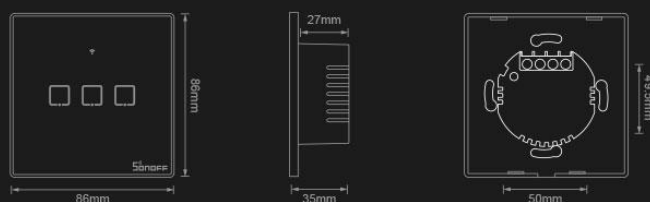

NOTE: Neutral wire is required

## Quick Start
