

KX-7851

Panasonic PBX Wireless Telephone 7851

The Panasonic 2.4GHz digital cordless telephone is powered by a rechargeable Ni-MH battery. It needs to be connected to a power source to remain operational. However, it features the Power Failure Talk System that allows you to make or receive calls during a power cut. This Panasonic single digital cordless telephone's caller ID has a memory capacity to store 50 names and numbers, while the phonebook can store up to 100 entries. The Panasonic digital cordless telephone features a 1.8-inch LCD display and can be mounted on a wall for ease of use.
