NEC Door Phone

Perfect for anyone who needs to monitor an entryway, this access control system rings to your phone when the call button is pushed, allowing you to choose whom you will receive instead of being caught unawares by those surprise visitors. Ideal option as a home or business intercom system.

The Analog Door Box is a self-contained Intercom unit typically used to monitor an entrance door. A visitor at the door can press the Door Box call button (like a door bell). The Door Box then sends chime tones to all extensions programmed to receive chimes. To answer the chime, the called extension user just lifts the handset. This lets the extension user talk to the visitor at the Door Box. Convenient to have at a delivery entrance. The Analog Door Box is a weather-tight unit and can be mounted outside. The maximum number of DSX Analog Door Boxes you can install is determined by the number of 2PGDAD Modules, which in turn is limited only by the availability of 16ESIU station ports. All equipment is brand new with a two-year factory warranty.

Compatibility:

SL1100

Each SL1100 cabinet comes with 2 built-in Door Box ports and 2 relays. You can have a maximum of 2 Door Phones per SL1100 cabinet, and a maximum of 6 Door Phones across 3 cabinets.

SL2100

Each SL1100 8-Port Digital x 2-Port Analog Combo Station Card comes with (1) conductor jack for 2 Doorboxes and 2 relays. You can have a maximum of 2 Door Phones per 8x2 Card, and a maximum of 6 Doorboxes per system.

DSX 40

The DSX-40 comes with 2 built-in Door Box ports and 2 relays. The relays provide a dry contact that can open a door or gate. You can use up to 2 Door Phones on the DSX-40 right out of the box. You can also expand the number of Door Phones by adding a Doorbox/Audio Interface Adapter. The maximum number of Door Phones depends on the availability of digital station ports.

DSX 80 / 160

To use a Door Phone with the DSX 80 or 160, it requires a Doorbox/Audio Interface Adapter. The maximum number of Door Phones depends on the availability of digital station ports.

Door Box Phone Features:

- Compatible with the SL1100/SL2100 and DSX Phone Systems
- The Analog Door Box is a weather-tight unit and can be mounted outside
- Allows you to conveniently talk to a visitor at the door through your phone
