# Receivers

Era Inti, One, Flor, NiceWay

**The complete line of receivers with Opera system functions, suitable for all installation requirements:**

- **with connector**, compatible with latest-generation Nice control units with SM port;
- **universal prewired**, for use with all types of control unit, for the control of any automation, lighting or irrigation system or other electric circuits.

**Maximum flexibility:** up to 1024 transmitters can be memorised.

**Convenient and practical:** the inclusion of a transmitter in the OXI/OXIFM, OX2T/OX2TFM and OX4T receivers allows radio codes to be accessed by means of the O-Box multifunction interface even when in inaccessible positions.

OXI/OXIFM, OX2T/OX2TFM and OX4T receivers can be used as signal repeaters to increase the operating distance between transmitters and other One series receivers.

**Secure use**, thanks to the 3 password-protected levels.

**The O-Box** and dedicated software applications for PC and PDA allow:

- **quick, user-friendly programming** of receivers and transmitters;
- **management** and printout of **code list**;
- creation of individual **installation databases** (useful in multi-user systems).

**SM plug-in receiver with Flor system functions**, step-by-step and anti-burglar functions.

**Management of multi-user system:** through the unique, personal code: the recognition receivers can receive and memorise up to 255 codes.

**Memorisation:** a particular receiver output can be associated to each transmitter key (e.g. key 3 TX= output 1 RX).
